SUMMARY

WordPress Developer with 3+ years of experience architecting custom WordPress themes, Gutenberg blocks, and WooCommerce platforms across PK, AU, and UAE markets.

- **Performance & Optimization:** Boosted Google PageSpeed (45 → 85+) and reduced migration downtime by 70% with zero data loss.
- **Technical Core:** Custom Themes, Gutenberg Blocks, PHP/MySQL, REST API, and Core Web Vitals.
- **Business Impact:** Delivered high-speed, SEO-optimized, and easy-to-manage sites for non-technical clients.

EXPERIENCE

OzTechWork — WordPress Developer *Dec 2025 – Present*

- Rebuild and maintain client websites by standardising custom-theme architecture and hosting maintenance on Hostinger
- Lifted Google PageSpeed scores from ~45 to 85+ by implementing Core Web Vitals best practices, lazy loading, and WP Rocket caching.
- Optimised database performance and built custom theme logic by working directly in PHP/MySQL — reducing content-update effort for non-technical clients.
- Extended site functionality through custom Gutenberg blocks and WordPress REST API integrations, giving editors reusable branded components and cleaner content workflows.
- Cut junior-developer ramp-up time from 14 days to 5 by building and maintaining the internal Elementor onboarding program — now adopted as the team standard.
- Safeguard uptime and security across the portfolio through weekly backups, database optimisation, Wordfence hardening, and proactive plugin-update schedules.

Mixintech — WordPress Developer *Apr 2024 – Jun 2025*

- Built and delivered responsive business and WooCommerce websites end-to-end — including payment-gateway integration — establishing core WordPress development expertise from the ground up.
- Cut migration downtime by ~70% with zero data loss by designing and standardising a staging-based workflow across multiple full site migrations.
- Increased indexed pages 30%+ within 60 days by implementing on-page SEO fundamentals — meta tags, schema markup, and Google Search Console setup.
- Mastered plugin architecture and troubleshooting by auditing and streamlining plugin stacks, resolving recurring conflicts, and cutting page weight for faster, more stable sites.
- Accelerated go-live timelines by building and reusing modular component libraries across client projects.

Ebakery — E-Commerce Intern *Jul 2025 – Dec 2025*

- Gained hands-on, cross-platform e-commerce exposure by supporting live store operations across Shopify and WordPress within an international team.
- Directly handled product listings, catalog updates, and store-workflow tasks — building practical fluency in international e-commerce operations beyond WordPress-only environments.
- Strengthened platform-management and cross-team collaboration skills by working alongside a distributed European team, focused on day-to-day optimisation rather than net-new development.

CORE SKILLS

WordPress Development: Custom Theme Development · Child Theme Development · Gutenberg Block Development (Custom) · WordPress REST API / Headless WordPress · Custom Post Types (CPT) · Advanced Custom Fields (ACF) · Elementor · WooCommerce · Plugin Architecture & Troubleshooting

Core Web Technologies: PHP · MySQL · JavaScript / jQuery · Responsive Web Design

Performance & SEO: Core Web Vitals Optimization · Page Speed Optimization · On-Page SEO · Schema Markup · Google Search Console

Security & Maintenance: Website Security Hardening · Wordfence · Database Optimization · Uptime Monitoring & Backups

Tools & Platforms: Hostinger · WP Rocket · Yoast SEO · Git · Figma (Design Handoff)

FEATURED PROJECTS

Technoor (UAE)

Built and fully revamped this UAE electronics eCommerce store end-to-end on a custom-theme architecture — resolved critical security issues, cleared page-speed bottlenecks, and optimised product layouts.

Custom Themes · WooCommerce · Security Hardening · Speed Optimisation

Looks Smart (PK)

Engineered this beauty salon booking platform end-to-end leveraging AI-driven development (Vibe Coding) — built an advance customer appointment booking system, service management, and a complete admin panel for business operations.

Tech Stack / Keywords: AI-Assisted Development Custom Theme Development · Booking System · Admin Panel · Full-Cycle Ownership

Oz Developers & LahoreSky

Built and run these real-estate business platforms end-to-end — architecture, layout, Hostinger server setup, and security protocols, with full ownership from build to maintenance.

WordPress · Real Estate Portals · Hostinger · Full-Cycle Ownership

Victorias Coffee (AU & PK)

Built a full WooCommerce store from scratch across the brand's Australian and Pakistani presence, reducing checkout drop-off and boosting Google PageSpeed from 41 to 88+.

WooCommerce · Custom CPT · ACF · WP Rocket

Wise Market Blogs (PK)

Built and independently run the blog portal for a leading Pakistani eCommerce marketplace end-to-end, owning speed, structure, and database responsiveness.

WordPress · Performance Tuning · SEO Optimisation

Wise Wheels Blogs (PK)

Built and solely manage this high-traffic car-auction blogging platform from the ground up — full ownership of load speed, layout structure, and site stability.

WordPress · Custom Theme Build · Speed Optimisation · Content Management

OzTechWorks (Go Green Project)

Built and independently run this sustainability/waste-management site end-to-end, from custom layout development to ongoing optimisation.

WordPress · Custom Layouts · Full-Cycle Ownership

ICream (PK)

Built and solely manage this food & beverage brand site — full ownership of uptime, UI, and security patching from initial build onward.

WordPress · Elementor · Full-Cycle Maintenance

Additional clients: MyPhonez · Padel Hub · Getmetutor
